## Professional Summary

Web designer and digital content specialist with experience dating back to 1999 in website development, online publishing, graphic design, and digital media. Experienced in creating and managing independent websites, producing digital content, and preparing graphics for professional print production.

Currently expanding technical skills through hands-on projects involving JavaScript, React Native, and AI-assisted development.

## Technical Skills

HTML CSS JavaScript WordPress SEO Responsive Web Design CorelDRAW FlexiSIGN Graphic Design Git & GitHub Visual Studio Code React Native Expo AI-Assisted Development

## Professional Experience

**Independent Website Development & Digital Publishing**
**1999–2025**

Created and operated independent websites focused on local information, music, entertainment, and digital content.

- **Nooga.com (1999–2011)** — Website development and online publishing.
- **Chattamusic.com (2001–2003)** — Chattanooga music-focused website.
- **Chattsounds.com (2010–2014)** — Local music website featuring original video interviews.
- **Comicsandmemes.com (2013–2025)** — Entertainment and digital content website.

**Printing Specialist — Victory Signs LTD**
**April 2017 – April 2019**

- Prepared artwork and graphics for professional printing and vinyl production.
- Used CorelDRAW and FlexiSIGN for design and production tasks.
- Worked with digital artwork and production requirements.

## Recent Development Projects

**SEO Preview Tool — 2026**

Developed an interactive web tool for previewing search engine titles, descriptions, and URLs in desktop and mobile layouts. Includes character counts, input validation, SEO feedback, and responsive design.

**Mood Music — 2026**

Developed a React Native mobile application prototype using Expo, featuring eight mood-based music categories, custom visual themes, album artwork, and playable audio previews.

## Professional Development

Continuing hands-on training in modern web development, mobile application development, JavaScript, Git/GitHub, and AI-assisted software development. Completed coursework in Adobe Photoshop.
